Lillian Paris

SKILLS

Full stack web developer passionate about learning new languages to construct sophisticated, user friendly, applications. Recently earned a certificate in full stack development from the U of A, strengthening my skills in JavaScript, Node.js, MySQL and arithmetic. Applied aspects of JavaScript and APIs in a recent project with four colleagues, to create an enjoyable night out application. Positioned to provide a useful perspective on user interface as well as constructing applications with a group. Known as a contemporary problem solver in search for a new project, with a focus on user friendliness and development. With each project, my ambition is to deploy quality applications for an impactful user experience.

EXPERIENCE

Movie Eaters/ Group Project

Deployed <https://daellarrek.github.io/Team-Grass/>
Repository <https://github.com/Daellarrek/Team-Grass>

This application allows its users to use their time more efficiently during a movie night out. Using geo location and mapquest, this application will display movie theaters in the users area as well as eateries.

Work Day Scheduler / Solo Endeavor

Deployed <https://lillianparis.github.io/work-day-scheduler/>
Repository <https://github.com/lillianparis/work-day-scheduler>

This calendar application will feature HTML and Css powered by jQuery. This application will help its users manage their time more effectively, alongside the demands of a busy life.

Password Generator / Solo Endeavor

Deployed <https://lillianparis.github.io/password-generator/>
Repository <https://github.com/lillianparis/password-generator>

This application serves to create a better sense of security for password keeping. This application is to include a responsive page that gives the user criteria for a password as well as generating one for the user.

Technical Skills

Audi Tucson / Receptionist

November 2019 - Present, 4646 E 22nd Street

Handling Audi's clientele, planning and organizing appointment times as well as communicating with the customers and staff.
